# Spin and Spell

**Preparation:** Make the spinner by cutting out and gluing the below circle of letters onto a plastic plate. Make a hole in the middle and attach the spinner arrow with a wire or paper clip (or buy one prepared). Glue either the b/w or color board onto stiffer paper (lamination optional). You need a marker to move along the board for each player and a die.

**Play:** Toss a die to move along on the board. After landing on square, learner spins the dial to get a letter. Learner says if the letter makes a word or not. If needed, refer to the list of possible words (below). If the letter makes a word, learner reads the word and explains its meaning. If the letter does not make a word learner chooses a letter that will make a word.
